- +91-9490885353
- LinkedIn:linkedin.com/in/mahesh-babu-ravella/

OBJECTIVE

To contribute effectively to software development by applying strong analytical, coding, and problem-solving skills. I aim to learn continuously, collaborate well in teams, and deliver reliable, high-quality project outcomes.

SKILLS AND INTERESTS

Programming Language	Python
Frontend Technologies	HTML5, CSS3, Bootstrap4, JavaScript
Soft Skills	Leadership, Adaptable, Organizing, Communication

EDUCATION

Gandhi Institute of Technology and Management — Oct 2021 - July 2025
Bachelors of Engineering in Electronics and Communication Engineering — CGPA: 9.27

Sri Chaitanya Junior College — June 2019 - July 2021
Intermediate — Percentage: 96.6

Triveni Talent School — June 2018 - May 2019
SSC — GPA: 9.8

EXPERIENCE

Intern | Defense Research and Development Laboratory (DRDL) — May 2024 - June 2024

- Designed and implemented an embedded system leveraging the Micro Blaze processor using the Xilinx Vivado and SDK design workflow.
- Validated system functionality through comprehensive testing and debugging, ensuring peak performance.

PROJECTS

Design and Implementation of circular patch Antenna for wireless applications

- Designed and implemented circular patch antennas optimized for mobile communications as part of an academic project.
- Parameters, including operating frequency, return loss, and VSWR, were analyzed and validated using CST simulation. The antennas were tailored for efficient performance at specific frequencies.
- Results confirmed superior performance for specific configurations, demonstrating the effectiveness of the design.

Wireless Charging Station for Electric Vehicles using Solar Energy

- Designed and implemented a solar-powered wireless EV charging station integrating renewable energy and wireless power transfer.
- Utilized Arduino Nano for system control, enabling real-time monitoring and efficient power management.
- Integrated RFID-based vehicle identification for customized charging, enhancing user interaction and sustainability by eliminating wired connections with solar power.

CERTIFICATIONS

- **Coursera** (Python Certificate)
- **Hackathon** (Certificate of Achievement in the Hackathon by FACE Prep)
- **Electric Vehicle Technology Workshop** (Certificate of Participation & Appreciation by IEEE)
